Add-on for WW4 Extended, an unofficial expansion for WW4 v2.5 (by Sanctuary)

Requirements

- [WW4 v2.5](#) by Sanctuary
- [WW4 Extended](#)v1.0 (both infantry and bundled vehicles)

Installation

Shortcut method

1. Delete any previous installation of this expansion (by deleting the *WW4EXT_CW* folder)

2. Decompress the zip file and place the *WW4EXT_CW* folder inside your *ARMA Cold War Assault* one.

3. Create a shortcut of the *ColdWarAssault.exe* file.

4. Right click on the new shortcut and click on *Properties*.

5. In the *Properties* window add the following line in the *Target* text field, just after the path to *ColdWarAssault.exe* :

   -mod=@ww4mod25;WW4_EXT;WW4_EXT_VEH;WW4EXT_CW;

6. Launch the game using the new shortcut.

Steam method

If you don't want to use shortcuts and use the Steam version:

1. Delete any previous installation of this expansion (by deleting the *WW4EXT_CW* folder)

2. Decompress the zip file and place the *WW4EXT_CW* folder inside your *ARMA Cold War Assault* one .

3. In your games list right click on *Arma: Cold War Assault* and select *Properties*.

4. In the *Properties* window click on the *SET LAUNCH OPTIONS...* button.

5. Write this in the text field:

   -mod=@ww4mod25;WW4_EXT;WW4_EXT_VEH;WW4EXT_CW;

6. Click *OK*. Click *Close*. Click *Play*.

If you want to skip the OFP intro you can add *-nosplash* before the *-mod* line, like this:

-nosplash -mod=@ww4mod25;WW4_EXT;WW4_EXT_VEH;WW4EXT_CW;
