

UK FORCES

JOINT HELICOPTER COMMAND

APACHE AH.1 & CHINOOK HC.2

SKIN MODIFICATIONS OF BIS AH-64D & CH-47F

Models: BI Studio Textures: BI Studio Texture Modifications: Geordie

Due to BI Studios announcing the UK Armed Forces DLC, I have decided to get these out without further delay.

Just a few quick Texture modifications to the BI stock textures to change these helicopters into RAF and AAC models.

No lumps and bumps are present that distinguish the actual helicopters apart from the US versions.

Notes:

There are issues with the Hellfire missiles; they have a ghost effect when viewing from below:

This anomaly is present in game without any mods; other people have also reported this issue with stock A2OA.

Enjoy.

Thanks to: BI Studio, UGAF, RKSL Rock, BI Forums and Armaholic.
